SUMMARY

Full Stack Developer with **2 years** of experience building enterprise **REST APIs** and frontend systems using **Java, Spring Boot, Angular,** and **AWS**. Hands-on experience with **microservices architecture** using **Apache Kafka, Spring Cloud Gateway, Netflix Eureka** service discovery, and **Resilience4j** circuit breakers. Proficient in **REST API design, JWT authentication, Docker** containerization, and **Angular** frontend development. **LeetCode 1500+** rating | **HackerRank 5-Star Python** | **130+ consecutive days** of daily coding challenges posted on **LinkedIn**.

EXPERIENCE

Full Stack Developer

Intellect Design Arena

Aug 2024 – Present

Chennai, India

- Built a **full-stack** migration toolset (**Spring Boot + Angular**) integrating **8+ migration utilities** for transitioning enterprise banking clients from legacy Message Hub to the iTurmeric low-code platform, reducing migration time by **50%**.
- Delivered a full-stack diff comparison module by integrating Spring Boot GitEngine APIs with an Angular diff viewer, improving validation efficiency by **30%**.
- Architected a scalable metadata-driven configuration management and template-driven module in Angular for Environment and Profile setup workflows. Implemented complex bidirectional **XML-to-JSON** transformation algorithms with intelligent fallback logic.
- Delivered **10+ feature enhancements** including ORM query extensions, Angular UI components (chips, date pickers), and cross-database compatibility improvements for PostgreSQL and Oracle.
- Contributed to an enterprise modular monolith (**Java 17, Jakarta EE 10, JBoss EAP 8.0**) with **20+ domain-driven modules** and OliveFabric Runtime engine handling REST API lifecycle management, dynamic routing, and multi-format message processing (JSON, XML, SWIFT, ISO 8583).

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, TypeScript

Frameworks: Spring Boot, Angular 15+, Hibernate, Bootstrap

Backend: REST APIs, Microservices, Spring Security, JWT, Kafka, Eureka, API Gateway

Cloud & DevOps: AWS (EC2, S3, RDS, EB), Docker

DB: MySQL, PostgreSQL, Oracle

Platforms & Tools: Leetcode, GeeksforGeeks, Git, GitHub, IntelliJ, VS Code, Postman, JUnit, Mockito, Maven, Gradle

Concepts: DSA, OOP, DBMS, System Design

AI & PRODUCTIVITY TOOLS

- Adopted **AIDLC** (AI-Driven Development Lifecycle) practices using **Claude Co-work** and custom **Agent Skill Files (SKILL.md)** to automate metadata schema generation (.orm, .oum, .flow), accelerating prompt-to-deployment workflows.
- Leveraged AI-assisted development tools (ChatGPT, GitHub Copilot, Cursor) for **prompt engineering**, rapid code generation, automated boilerplate testing, and catching edge-case bugs early in the development cycle.

PROJECTS

Job Application Tracker – Microservices Backend | Java 21, Spring Boot 3.2, Kafka, Docker, JWT GitHub

- Architected a production-grade **microservices backend** using Spring Boot 3, **Spring Cloud Netflix Eureka, API Gateway, Resilience4j** circuit breakers, and **Apache Kafka** for asynchronous event-driven communication.
- Engineered a **User Service** with **JWT** stateless authentication and **BCrypt** password hashing, along with a **Job Service** implementing a finite state machine for application lifecycle management and complete audit trail persistence.
- Implemented Kafka producer-consumer architecture with dedicated topics, partitioned event routing, and a Notification Service delivering automated email notifications via JavaMailSender while remaining fully decoupled from business logic.
- Containerized all services using **Docker** multi-stage builds and orchestrated them with **Docker Compose** using isolated MySQL and PostgreSQL databases per service following the **Database-per-Service** pattern.

ACHIEVEMENTS

- Received the **Spotlight Award** at Intellect Design Arena Ltd for developing a reusable Tree Compare Solution. [LinkedIn Post]
- LeetCode Rating: 1500+ – HackerRank: 5-Star Python** Badge [Leetcode Profile]
- Earned the **AWS Certified Cloud Practitioner** certification. [Certificate]

EDUCATION

Amrita Vishwa Vidyapeetham

Bachelor of Technology in Computer and Communication Engineering

2020 – 2024

Coimbatore, India
